Validity Study on NIE 88-56

Probable Developments in Colombia

Published 10 April 1956

NIE 88-56 for the most part correctly assessed the character of the political situation obtaining in Colombia and indicated that the Armed Forces might overthrow the Rojas Pinilla dictatorship. It failed to point up the possibility of an increase in Communist influence under a successor government, and probably tended to over-stress the degree of Communist control over the guerrilla movement.
